Say you saw it advertised in the SCIENCE NEWS-LETTER

Read The NEWS-LETTER Every Week!

Does the NEWS-LETTER come to your desk or library table regularly? Or is this the first issue that you have seen for some time? With all the good things we have in store for the coming weeks, we do not believe that you will want to miss an issue. Here are some of them:

A Special Science Travel Number—telling of places of scientific interest in the United States, Canada and Europe that you can visit on your vacation next summer.

The Things that Get on Peoples' Nerves.

Using Radium to Measure the Age of the Earth (written by Dr. Paul Heyl—the man who weighed the earth).

The Discovery of the Lever by Archimedes (A Classic of Science).

The Heavens for March.

Portraits and biographical notes of leading scientists.

Fascinating accounts of wild life in Nature Ramblings.

—and so many others that it would take all of this issue to tell you of them.

This is the way to be sure to see all these:

If you are not at present a subscriber to the SCIENCE NEWS-LETTER, send us \$2.00 (we don't mind getting \$2.00 bills) and we will send it to you for the next six months.

How to Use Key-Word Feature of News-Letter

In order to aid in catching the items that concern you and to facilitate clipping and filing, a key word in small capitals has been printed on the right of the line above each article. The key words used fit into any system of classification, whether it be a straight alphabetical file, a system of your own devising, the Library of Congress classification or the Dewey system.

Note that you can clip out any article without fear of damaging another article in which you might be interested, since editorial matter printed on the right-hand pages is backed by advertising, standing matter or a continuation of the article on the other side.

Library of Congress Classification

The classification of the Library of Congress has come into common use in the libraries of the country owing to the publication by the Government of the card index of all new books. We print below a list of the subject titles which are most used in the SCIENCE NEWS-LETTER. The full scheme of classification is contained in "Outline Scheme of Classes," issued by the Library of Congress.
