

The gates which science opens to the inquiring mind are wide---

And lead to truth

Better books in science are being published every year. A growing public is developing an interest in good books in popular science—books which are authentic as science, yet written with verve and the tang of romance. A few which have awakened a responsive chord in such readers are listed below.

- | | |
|---|---|
| The Rise of Modern Physics \$5.00 | Common Sense of the Theory of Relativity \$1.00 |
| By HENRY CREW. A fascinating narrative of the men and discoveries which have made physics a science. | By PAUL R. HEYL. The Einsteinian theory in a nutshell for the general reader and student. |
| Animal Life of the Carlsbad Cavern \$3.00 | Fighters of Fate \$3.00 |
| By VERNON BAILEY. Looking on at the history and natural life of the great cavern of Carlsbad, New Mexico, the largest and most spectacular cave yet found in America, perhaps in the world. | By J. A. MYERS. Short biographies of 24 men and women who overcame the handicap of disease and achieved success in art, literature, science, etc. |
| Popular Guide to Radio \$3.50 | Fundamental Concepts of Physics \$2.00 |
| By B. FRANCIS DASHIELL. Relating the whole story of radio for the non-technical reader—its history, development, and operation. | By PAUL R. HEYL. A small book which in an hour will tell you what modern concepts of physics are, and why. |
| The Beaver: Its Work and Its Ways \$3.00 | Naturalist's Guide to the Americas \$8.00 |
| By EDWARD R. WARREN. The most interesting small animal in America described by a man who has spent years in its study. | Edited by VICTOR E. SHELFORD. Selected by the American Library Association for the League of Nations as one of the 40 Best Books of 1926. A guide to the nature lore of the Americas. |
| Conservation of the Family \$3.00 | Popular Research Narratives Volume I \$.50
Volume II \$1.00 |
| By PAUL POPENOE. A biologist tells what the value of the family as an institution is, why it is, and whither it is going. | Edited by ALFRED D. FLINN. Two small volumes of 50 five-minute stories of discovery, invention and research by the men who "did it." |
| Fogs and Clouds \$4.00 | Rain Making and Other Weather Vagaries \$2.50 |
| By WILLIAM J. HUMPHREYS. A well-known weather expert tells how to recognize and identify clouds and fogs, and offers nearly 100 of the finest cloud photographs ever taken. | By WILLIAM J. HUMPHREYS. An entertaining and instructive explanation of attempts to produce rain by magic, religious and scientific means. |
| Chemistry and Recent Progress in Medicine, \$1.50 | Tree Ancestors \$3.00 |
| By JULIUS STIEGLITZ. A simple retelling of the gifts of the chemist to modern medical progress. Recommended by the Chemical Foundation in their essay contest. | By EDWARD W. BERRY. The story of the greatest of natural wonders, trees. |
| | Weather Proverbs and Paradoxes \$1.50 |
| | By WILLIAM J. HUMPHREYS. A book to make you weather-wise, full of the true and the false in weather wisdom. |
