SCIENCE NEWS LETTER

N Current The Weekly Summary of V Science

Published by

SCIENCE SERVICE

The Institution for the Popularization of Science organized under the auspices of the National Academy of Sciences, the National Research Council and the American Association for the Advancement of Science.

Edited by WATSON DAVIS

Subscription rates—\$5.00 a year postpaid; two years \$7.00; 15 cents a copy. Ten or more copies to same address, 5 cents a copy. Back numbers more than six months old, 25 cents.

Canadian and Foreign subscribers please add two dollars (\$2.00) per year to regular subscription rates to cover postage.

In requesting change of address, please give your old address as well as the new one in notification to Circulation Department, SCIENCE NEWS LETTER, 21st and Constitution Ave., Washington, D. C., at least two weeks before change is to become effective.

Advertising rates furnished on application.

Board of Trustees of Science Service

Honorary President, William E. Ritter, University of California. Representing the American Association for the Advancement of Science, J. McKeen Cattell, President, Editor Science, Garrison, N. Y.; Burton E. Livingston, Johns Hopkins University, Baltimore, Md.; Raymond Pearl, Director, Institute for Biological Research, Johns Hopkins University, Baltimore, Md. Representing the National Academy of Sciences, W. H. Howell, Vice-President and Chairman of Executive Committee, Johns Hopkins University, Baltimore, Md.; R. A. Millikan, Director, Norman Bridge Laboratory of Physics, California Institute of Technology, Fasadena, Calif.; David White, Senior Geologist, U. S. Geological Survey. Representing National Research Council, Vernon Kellogg, Secretary Emeritus, National Research Council, Washington, D. C.; C. G. Abbot, Secretary, Smithsonian Institution, Washington, D. C.; Harrison E. Howe, Editor of Industrial and Engineering Chemistry. Representing Journalistic Profession, John H. Finley, Associate Editor, New York Times; Mark Sullivan Writer, Washington, D. C.; Marlen E. Pew, Editor of Editor and Publisher, New York City. Representing E. W. Scripps Estate, Harry L. Smithton, Treasurer, Cincinnati, Ohio; Robert P. Scripps, Scripps-Howard Newspapers, West Chester, Ohio; Thomas L. Sidlo, Cleveland Ohio.

Copyright, 1934, by Science Service, Inc. Republication of any portion of the SCIENCE News Letter is strictly prohibited since it is distributed for personal, school, club or library use only. Newspapers, magazines and other publications are invited to avail themselves of the numerous syndicate services listed by Science Service details and samples of which will gladly be sent on request.

Members of the American Association for the Advancement of Science have the privilege of subscribing to the SCIENCE NEWS LETTER at the reduced price of \$3 per year. Application for this privilege should be accompanied by privilege card obtained from the Permanent Secretary, A. A. A. S., Smithsonian Institution Building, Washington, D. C.

Publication Office, 1930 Clifton Ave., Baltimore, Md., Editorial and Executive Office, Constitution Ave. at 21st St., N. W., Washington, Address all communications to Washington.

stitution Ave. at 21st co.,
D. C.
Address all communications to Washington
D. C. Cable address: Scienservc, Washington.
Entered as second class matter October 1,
1926, at the post-office at Baltimore, Md., under
the act of March 3, 1879. Established in mime
ographed form March 13, 1922. Title registered
as trade-mark, U. S. and Canadian Patent Offices.

DO YOU KNOW?

In the Arctic, February is the coldest month.

More than a pound of pure vitamin C in the form of ascorbic acid has been prepared from paprika.

A concern in Holland claims to have evolved a photochemical process for printing designs on fabrics.

The palace of the Soviets to be built in Moscow will be the world's tallest building, according to the plans.

Government scientists have perfected a method for recovering milk albumen from sweet whey, so that it can be used in baby foods.

Scientific tests show that light from the red end of the spectrum darkens apple juice and has a good effect on the flavor, whereas light from the blue end bleaches the juice and ruins the flavor.

Czechoslovakia is experimenting with glass as a raw material in roadbuilding.

Among recent important textile discoveries is a new type of cloth, a substitute for linen.

Demand for methanol in Japan has so increased that efforts are being made to produce it synthetically.

Roman emperors at times staged exhibitions of their rare art possessions in the Forum or the Colosseum.

New York is trying the method of stopping all vehicle traffic at intervals at intersections, so that pedestrians may cross in safety.

The weather vane on the Empire State Building in New York, 1,265 feet above ground, is said to be the highest weather vane in the world, compared with its surroundings.

WITH THE SCIENCES THIS WEEK

ANATOMY

When does boys' and girls' growth spurt? p. 195.

ANTHROPOLOGY
How much of Nordic pride is based on sea food? p. 198.
Is there a normal size for the body's parts? p. 197.

ARCHAEOLOGY
How old is the temple discovered at Tepe
Gawra? p. 198. Archaeology and the Bible—
George A. Barton—Amer. Sunday-School

George A. Barton—Amer. Sunday-School Union, 1916, \$3.50.

Was there a Bone Age before the Stone Age? p. 199.

Where did mud preserve a masterpiece? p.

196. Who rated burial in the Monte Alban tombs? p. 200.

ASTRONOMY

What planet is visible in April? p. 203. What was the mishap at the pouring of the largest telescope mirror? p. 195.

BIOPHYSICS

Do bacteria like heavy water? p. 200.

CHEMISTRY

What is the atomic weight of europium? 201.

What weed poisons chickens? p. 200. Where is bromine taken from the sea? p.

CHEMISTRY—ENGINEERING
How do molecules of the best lubricating oils behave? p. 205.

CHEMISTRY—PHYSICS

How much mass three hydrogen is in ordinary water? p. 198.

ECOLOGY

Where has plant society now become stratified? p. 207.

Engineering What is the "railplane?" p. 206.

ETHNOLOGY Who were the Mascoutens? p. 201.

GEOLOGY What is travertine? p. 195.

MEDICINE

How is "processed" serum made ready for use? p. 196.

MEDICINE—PHYSICS

How much heavy water will be at Princeton by summer? p. 204.

NUTRITION
Which sex needs protein most? p. 204.

What does alcohol do to the myelin sheath? p. 199. Alcohol: Its Effects on Man—Haven Emerson—Appleton, 1934, \$1.

PLANT PATHOLOGY

Do plant parasites have "instinct?" p. 200.

Psychology

How many years does the human body grow?
p. 205. The Growing Boy—Paul Hanly Furfey
—Macmillan, 1930, \$2.

Public Health

What proportion of communicable diseases are transmitted through the mouth and nose? p. 201.

SEISMOLOGY

How strong was the March 12 Utah earthquake? p. 207.

Sociology
Is a "throw-back" baby possible? p. 207.
Is the Japanese birth rate decreasing? p. 200.

LOOLOGY
How does Darwin's Frog care for its voung?
P. 203. Charles Darwin's Diary of the Voyage
of H.M.S. "Beagle".—Nora Barlow—Macmillan, 1933, \$6.50.
What is a centurio bat? p. 196.

These curiosity-arousing questions show at a glance the wide field of scientific activity from which this week's news comes. Book references in italic type are not sources of information for the article, but the references for further reading. Books cited can be supplied by Book Department, Science News Letter, at publishers'
