

Announcing THE NEW Overseas Edition OF Science News Letter

PUBLISHED BY SCIENCE SERVICE IN THE PUBLIC INTEREST

STARTING with October, every month SCIENCE NEWS LETTER will issue a special *Overseas Edition*.

This special edition will be sixteen pages, and pocket size; it will be printed on Air Mail weight paper; type and pictures will be one-third smaller; and it will be issued once a month. This international edition will contain only the scientific news of interest to the men and women overseas. Such material as how to dehydrate food, diet hints for blood donors, immunization of children against disease—news important to us here but not vital to them there—will be cut out in order to pack into the *Overseas SCIENCE NEWS LETTER*, the science information of greatest interest and use to members of our armed forces wherever they are.

We will send the *Overseas SCIENCE NEWS LETTER* by **FIRST CLASS MAIL** to any man or woman in the Armed Services overseas, each month, for \$1.25 per year.

You need not get permission from the military authorities to make this gift; it will go quickly and in the same kind of mail as *your personal letters*.

Solves Your Overseas Gift Problem—FOR CHRISTMAS OR OTHERWISE

We can start the *Overseas* subscription with the current October special issue. This edition can be sent only to Soldiers, Sailors and Marines, *Overseas*, at this \$1.25 per year rate.

To Science News Letter, 1719 N Street, N.W., Washington 6, D. C.

For the enclosed \$1.25 please send the "Overseas" monthly edition of SCIENCE NEWS LETTER, starting with the October issue.
