TWENTY-FIFTH ANNIVERSARY

1946

*From the family car to the school bus, the grocer's truck to the moving van, the baker's truck to the milk "wagon"—gasoline powered vehicles are as important to the American family as the home itself.*

## American homes run on gasoline

**M**OTOR TRANSPORTATION is so closely woven into the pattern of American living that every man, woman and child benefits when its cost is reduced.

For many years, Ethyl antiknock fluid, used by refiners to improve gasoline, has been of considerable help in the big, overall job of providing the nation with more economical transportation. That is because improvements in the power and efficiency of engines have depended to a large extent upon higher antiknock gasolines.

Because automobile engines, fuels and lubricants are so closely related to each other in development and use, Ethyl's research and service organizations have always worked closely with both the automotive and the petroleum industries. Today we are expand-

ing those facilities so that in the coming years of progress we shall be able to offer even more assistance to refiners who use our product and to engine builders who are eager to utilize the greater power in improved gasoline. Ethyl Corporation, Chrysler Building, New York 17, N. Y.
