TWENTY-FIFTH ANNIVERSARY

1946

## Prophet, *with* honor...

"Had a Jules Verne sought to imagine some universal servant of mankind, he would well have depicted some *magic agent* which would apply Nature's forces to do man's work . . . which could take the energy out of hidden coal and falling water, carry it by easy channels and cause it to give the light of a million candles, the power of a thousand men — or to produce heat without combustion, and unlock chemical bonds and release new materials . . ."

These are words of George Westinghouse, prophetic words because he uttered them many years ago on the

subject of *electricity*—and then, as inventor and forward-looking industrial leader, did much to make them come true.

Scientific societies, kings, and governments throughout the world honored George Westinghouse with their proudest medals and decorations.

But he himself built his own lasting monument to greatness—the giant industries he created. They serve today because they were founded by a man who looked ahead into the *future of human needs*, then found the practical means to satisfy them.

### George Westinghouse Centennial Forum

As a fitting tribute to the memory of George Westinghouse, a meeting of distinguished scientists and engineers will be held in Pittsburgh, from May 16th to May 18th.

At this George Westinghouse Centennial Forum, world-famous authorities will discuss such subjects as: "The Future of Atomic Energy" . . . "Transportation — A

Measurement of Civilization" . . . "Horizons in Communications" . . . and "Science and Civilization."

As sponsor, the Westinghouse Educational Foundation sincerely hopes that the Forum will accomplish much good in showing the way to a *better, happier, safer peacetime world*.
