

ALL-WEATHER ONION SPRAY—A new spray program, combining fungicides and insecticides, is saving onion crops on 15,000 acres in New York. The program, developed at Cornell University Experiment Station, Ithaca, N. Y., costs about \$1.50 an acre for each weekly application.

ENTOMOLOGY

Maggot Is Jekyll-Hyde

► **EVERY FAT**, wormlike maggot is a Jekyll-and-Hyde, actually two individuals within a single body.

Maggots are juvenile, or larval, stages of flies, hatching from fly eggs, yet they do not grow up to become flies. When the time comes for the change from maggot to adult fly, nearly all the body tissues of the larva go into a state of dissolution, and the fly is newly created from undifferentiated cells carried about within the maggot.

The dissolved maggot tissues are used to nourish the developing organs of the fly.

This was reported by Dr. R. E. Snodgrass, entomologist and collaborator with the U. S. Department of Agriculture, in a review of scientific knowledge of fly metamorphosis.

This dual development is most accentuated in a special group of flies, the *Cyclorhapha*, that include the hump-back flies, flat-foot flies, big-eyed and syrphus flies.

The maggot of these flies, he said, has diverged so far from the evolutionary course which produced the adult that it has become an independent creature in no way structurally related to its parents.

When the larva has completed its destiny, it gives way to the developing undifferentiated cells that then produce the fly, bringing death for the "Jekyll" but life to the "Hyde."

Dr. Snodgrass gave this summary in a paper, "The Metamorphosis of a Fly's Head," Smithsonian Miscellaneous Collections (Vol. 122, No. 3).

ICHTHYOLOGY

13 Fish at Once Dragged From Surf

► **WITH SPOTLESS** conscience and the backing of the California Academy of Sciences, Charles D. Podesta can tell his grandchildren how he made one jump in the California surf and dragged ashore 13 fish with his bare hands.

Returning from salmon fishing off Halfmoon Bay, Mr. Podesta saw a queer fish with a fin like a sailfish's thrashing in the surf by Princeton pier near San Francisco. He rushed into the water, grabbed the fish by its tail, and after a rough battle, beached the prize, a slim, 53-inch fish with a mouthful of wicked teeth.

He took the fabulous catch to the California Academy, where it was identified as a lancetfish, *Alepisaurus borealis*. The ichthyologists, however, did not rest at that.

They sliced open the specimen to discover a 20-inch hake in its capacious interior. Then probing into the hake, they found 10 sanddabs and one curlfin turbot in its abdomen.

Count them up. Thirteen fish at once!

SELLS FIRST STORY AT 60

"Since I am crowding threescore my objective in taking the N.I.A. Course was not to become a professional writer. However, while still taking the course, I sent an article to *St. Joseph Magazine*. It was immediately accepted. 'Our Navy' accepted others. All thanks to N.I.A."—Albert M. Hinman, 1937 East Silver Street, Tucson, Arizona.

To People who want to write but can't get started

DO YOU have that constant urge to write but fear that a beginner hasn't a chance? Here is what the former editor of *Liberty* said:—

"There is more room for newcomers in writing than ever before. Some of the greatest of writing men and women have passed from the scene. Who will take their places? Fame, riches and the happiness of achievement await the new men and women of power."

A Chance to Test Yourself—FREE

The Newspaper Institute of America offers a **FREE Writing Aptitude Test**. Its object is to discover more men and women who can add to their income by fiction and article writing. The Writing Aptitude Test is a simple but expert analysis of your latent ability, your powers of imagination, logic, etc. Those who pass this test are qualified to take the famous N. I. A. course based on the practical New York Copy Desk Method which teaches you to write by writing. You work at home, in leisure time, constantly guided by experienced writers. Soon you acquire the coveted "professional" touch. Then you are ready to market your stories, articles and news items.

Mail the Coupon Now

Taking the **FREE Writing Aptitude Test** requires but a few minutes and costs nothing. So mail the coupon now. Take the first step towards the most enjoyable and profitable occupation—writing for publication! Newspaper Institute of America, One Park Ave., New York 16, N. Y. (Founded 1925) (Licensed by State of N. Y.)

FREE Newspaper Institute of America

NEW MIRACLE TUBELESS HEARING AID REVEALED

- Costly B-Battery Eliminated
- All Battery Costs Slashed 80%
- Powered by Three Transistors
- Vacuum Tubes Banished Forever

FREE BOOK! Write today for authoritative illustrated book describing this new Atomic Age miracle invention, the Transistor, and what it means to the hard of hearing. No obligation whatsoever! A postcard will do.

Beltone HEARING AID CO.
1450 West 19th Street, Dept. 356A
Chicago 8, Illinois
