## Eskimo Clothing Better Than U. S. Designed Gear

► ESKIMO CLOTHING is better for wear on Alaskan field trips than outer garments designed by the U. S. Armed Forces for use in the Arctic, Dr. William S. Laughlin, University of Wisconsin anthropologist, concludes.

Military underwear is, however, satisfactory for Arctic use, Dr. Laughlin found.

Recently returned from an Alaskan field trip sponsored by the Arctic Aeromedical Laboratory of the U. S. Air Force, Dr. Laughlin says caribou skin outer garments, when the hair is left on the skin, are apparently lighter and warmer than anything United States scientists have yet developed.

"Perhaps the air spaces between the hairs account for the greater warmth of Eskimo outer clothing," Dr. Laughlin suggests. Air is known to be a good insulator.

The cumbersome, bulky-looking boots and mittens worn by Eskimos are not really as heavy as they look, Dr. Laughlin explains. In fact, Eskimo outer clothing weighs less than the outer clothing designed by American military scientists.

### Killer of the Seas

► OIL that brings calm to troubled waters also brings slow but certain death to many thousands of water birds every year.

Many tankers and other large vessels commonly pump out great quantities of oil-laden bilge water near the entrance to ports or close to land. This oil forms a thin,

glistening coat over the water. Any sea bird unlucky enough to alight on such oil-polluted water can begin counting his days, for he is doomed.

When a water bird becomes oil-soaked, his feathers become matted together. This destroys their cold- and water-repelling qualities. Soon the bird becomes water-logged, unable to fly, unable to protect himself from the cold. If he does not drown outright, he faces a slower death from exposure or starvation.

Gulls, puffins, shearwaters and terns die by the thousands each year in oil-polluted water, as do many game waterfowl like black ducks, mergansers and scoters.

One of the saddest parts of this problem is that the birds are often attracted by the glistening of the oil-coated water, or by its comparative calmness.

The problem is especially acute off Boston, Long Island, the mouth of the Delaware River, Galveston and the banks of North Carolina, reports the U. S. Fish and Wildlife Service. Due to the nature of the coast, much of the U. S. Pacific is spared the worst effects of oil pollution.

But not just the United States is concerned with this killer. In 1954, 42 nations met in London to draft an international agreement to prevent oil pollution of the seas by ships dumping oil-containing wastes in zones where birds and other creatures might be harmed.

At present in the U. S., the Army Engineers are responsible for the enforcement of existing laws to control oil pollution from ships. But enforcement is difficult, to say the least, due to the international nature of shipping. Thus, only international law can probably give the control that is needed.

Conservationists are both pessimistic and optimistic about the oil-pollution killer. They are saddened by the needless loss of wildlife, but they know that proper controls could wipe out this menace almost completely.

Science News Letter, February 4, 1956

The true sea *snakes* have a poison as deadly as that of the cobra.

By the end of the fifth year of marriage, about three-fourths of American white women are *mothers*, the 1950 census showed.

## A Complete Professional TELESCOPE

### 4-INCH DYNASCOPE® 65X-130X-167X

A fine parabolic mirror reflecting telescope for every astronomer—amateur or professional—who insists upon fine optical performance. An instrument of this high quality has never before sold at anywhere near this astonishingly low price. In fact, it is the only reflecting telescope available for under \$100 with a parabolic mirror, rack and pinion focus and 3 achromatic eye pieces.

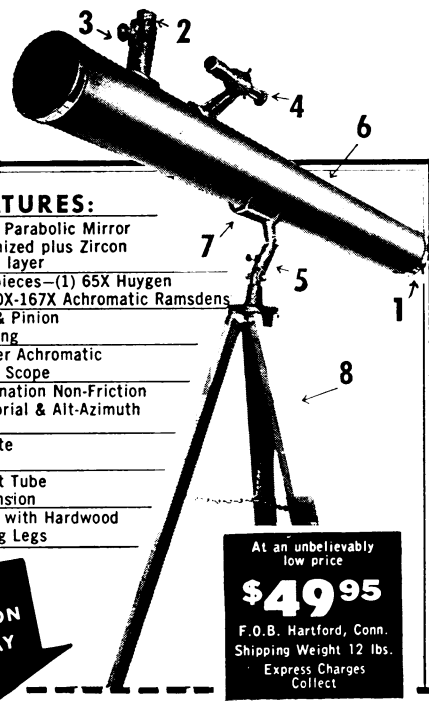

The *Dynascope* will resolve Epsilon Lyrae as four brilliant gems. The Herodotus Valley of the Moon can be clearly seen with breath-taking sharpness. Polaris and Zeta Ursa Majoris are resolved with excellent definition.

A fully achromatic precision instrument, scientifically constructed, the *Dynascope* will give you years of astronomical pleasure and satisfactory service. It is completely assembled, fully aligned, ready for use. Each *Dynascope* must pass rigid resolution and diffraction tests before shipment and is sold on an ironclad money back guarantee.

**CRITERION MANUFACTURING CO.**  
331 Church Street • Hartford, Conn.

#### FEATURES:

- 1 4 inch Parabolic Mirror Aluminized plus Zircon Quartz layer
- 2 3 Eyepieces—(1) 65X Huygen (2) 130X-167X Achromatic Ramsdens
- 3 Rack & Pinion Focusing
- 4 4-power Achromatic Finder Scope
- 5 Combination Non-Friction Equatorial & Alt-Azimuth Mount
- 6 Bakelite Tube
- 7 4-point Tube Suspension
- 8 Tripod with Hardwood Folding Legs

At an unbelievably low price  
**\$49.95**  
F.O.B. Hartford, Conn.  
Shipping Weight 12 lbs.  
Express Charges Collect

CRITERION MFG. CO., Dept. SND-14  
331 Church St., Hartford 1, Conn.

Please ship me at once, subject to your money back guarantee, 4-inch Dynascope Telescope.
