A Satellite View of The World

This relief Globe shows the entire earth in three dimensions without boundaries or physical distortions.

On the attractive pale blue surface you can draw or paint, outlining boundaries, coloring in climate zones, tracing sea and airplanes—then wash them off and put on new facts.

Accurately formed in durable plastic this globe can be lifted off its base and handled freely.

This twelve inch relief globe with a hand spun aluminum base and a large (36" x 52") colorful map of the world is only \$12.95 add 80¢ for postage and handling in the United States, \$1.50 for abroad.

Predict Satellite Orbits! with the Star Pointer

A few simple settings will provide:

- 1) The pole of the satellite orbit.
- 2) The inclination of the orbit to any meridian.
- 3) The time of the next appearance of the satellite.
- 4) The satellite's magnitude of precession per day.

The Star Finder also gives the altitude and azimuth of the satellite when under observation. In this capacity the Star pointer can be extremely useful to observatories and professional astronomers for rapidly and easily checking orbital computations. You set the dials, point the base north, sight along the arrow and there is your star, constellation or satellite. No computations, no guesswork, the built-in computer does the work for you. A child of ten can operate it with a few minutes instruction. Beautifully constructed of heavy 100-point mounting board, dirt and moisture resistant, the Star Pointer is over 18" long when assembled, packs flat in a jiffy. Complete fully illustrated 33-page book of instructions with 8 star maps that cover the entire sky. Plus . . . A new planet-finder at no extra cost enables you to locate Mercury, Venus, Mars, Jupiter and Saturn at any time until December 31, 2059.
