

# TO THE SCIENCE CLASSROOMS OF AMERICA From

Building of the National  
Academy of Sciences and  
National Research  
Council.

In which the offices of  
**SCIENCE SERVICE**  
are located.

Each new term of school should bring its new ideas—and the teacher of science will welcome our publication, the weekly **SCIENCE NEWS-LETTER**, as an excellent and convenient supplement to the scientific text-book.

The **NEWS-LETTER** is now seven years old—a magazine that was **REQUESTED** by the readers of our newspaper stories of science. It is, in fact, a *personal* newspaper, a welcome visitor that arrives each week, filled from cover to cover with scientific data, written in a concise, understandable style that is as accurate as it is interesting.

Whether the student is studying biology, physics, chemistry or general science, this weekly magazine, brief and timely, will vitalize his classroom work and give him an appreciation of the part that science is playing in modern life.

A special rate makes it possible for each member of the classroom to enjoy the magazine for we can supply each individual member at less than a dollar—when ten or more copies are sent to the same address. For, ordered in group subscriptions, the price is

**90 CENTS EACH.**

Individual school subscriptions for the new semester.... \$1.50  
Regular price per year..... 5.00

---

**SCIENCE SERVICE,**  
2189 B Street,  
Washington, D. C.
