The most extensive collection ever published, for layman and expert, of the great literature of Mathematics from the Rhind Papyrus of Egypt to Einstein's theories, edited by JAMES R. NEWMAN. Presented in 4 handsome illustrated volumes with 500 drawings, halftones and facsimile reproductions

THE WORLD OF MATHEMATICS, published in 1956, became an instantaneous and spectacular bestseller. Since then this superb collection has found its way into more than 102,000 homes in the original higher priced, hard-bound editions.

Over the years it has become apparent that, for many thousands for whom the collection would be most rewarding, the \$25 price has been too high. So we explored every possible way of producing a handsome, readable, durable set at far less. The result is the forthcoming four-volume paperback WORLD OF MATHEMATICS. Not a word has been cut. The type page is exactly the same as in the original edition. The paper, while of lighter weight, is of excellent quality. The principal cost difference is in the binding and in our expectation of savings on a large first printing. And we are extremely pleased with the handsome paper-cover binding. The result, at the anticipated price of \$10 for the boxed set, is surely one of the great book bargains of all time.

From Vajda on Matching Pennies to the Theories of Einstein

From Archimedes on Popy Seeds and The Universe to Shaw's The Vice of Gambling and the Virtue of Insurance —

here are 133 great books, essays, articles and stories — more than a million words. All are woven together with a clear and brilliant 130,000 word commentary by James R. Newman, member of the Board of Editors of *Scientific American Magazine*.

Do you know what the smallest thing in the Universe is? The biggest? The fastest? Read D'Arcy Thompson's essay on *Magnitude*. From Von Neumann's classic *Theory of Games* to the mathematics of music — even of metaphysics and golf — every field of mathematical thought is represented.

Two basic books are included in full: Jourdain's *The Nature of Mathematics* and Turnbull's *The Great Mathematicians*.

Special Pre-Publication Offer

This paper-bound, 4-volume boxed edition would ordinarily be priced at \$12 or more. How-

ever, the success of the higher-priced edition has encouraged the publishers to plan an unusually large first printing. It is hoped in this way the retail price may be brought down to \$10.

In order to build up the size of the first printing, and reduce the cost per set, we are accepting advance reservations from the readers of this announcement. In return for helping us increase the size of this printing by entering your reservation now, you will receive the complete set at a special pre-publication price of only \$8.95.

SEND NO MONEY

Simply mail the reservation certificate today. A set will be sent to you as soon as it comes off the press. If not completely delighted, return it to us and owe nothing. SIMON AND SCHUSTER, Publishers, Dept. 87, 630 Fifth Avenue, New York 20, N. Y.
