ORGANIC CHEMISTRY FOR THE HOME LAB

Learn to think chemically . . . Mauve, the first aniline dye, was discovered one hundred years ago by a young chemist who followed where his curiosity led him. You can make this and other beautiful dyes, interesting plastics, fundamental chemicals, by following these clear directions. . . a handy book, written by Burton L. Hawk.

Postpaid \$2.00

SCIENTIFIC INSTRUMENTS YOU CAN MAKE

How teen-age scientists have designed and built astronomical instruments, spectrosopes, Tesla coils, oscilloscopes, cloud chambers, atom counters, Van de Graaff generators, electronic computers, stroboscopes, and demonstrated ultrasonics, chromatography, photomicrography and mathematical constructions. Illustrations show the completed instruments. References guide the reader to research in the fields opened by use of these instruments.

Postpaid \$2.00

THE CHEMICAL ELEMENTS

Their properties, sources, most important isotopes, characteristic compounds, places in the periodic table and histories of their discoveries, including announcements. Up-to-date, revision includes element 102. Fully indexed, paper bound. Invaluable for reference. By Helen M. Davis with revisions by Dr. Glenn T. Seaborg.

Postpaid 10 copies for \$5.00. Each 55c

SCIENCE EXHIBITS

Science Exhibits tells you how to select your material, how to plan its presentation, how to display, to label and to light it, how to describe the work you have done.

Postpaid \$2.00

EXPERIMENTING WITH CHEMISTRY

For those who wish to start experiments in chemistry, this is a guide and laboratory manual which includes, as well, detailed explanations of reactions and processes for advanced students. More than 125 experiments. Special sections on sympathetic inks, spectacular reactions, spontaneous combustion, blow pipe analysis and metallurgy. By Burton L. Hawk.

Postpaid \$2.00

THOUSANDS OF SCIENCE PROJECTS

Are you looking for something to do in science? Do you need inspiration for a science exhibit? Do you want a suggestion for a project report? Every student can find answers to these questions in this 48-page, illustrated booklet listing classified titles of exhibits shown at science fairs and/or produced as projects for the annual Science Talent Search. Postpaid 10 copies for \$1.00. Each 25c

SCIENCE PROJECTS HANDBOOK

This usable new book includes a variety of examples of successful projects done by winners and members of the Honors Group in the Science Talent Search and finalists in the National Science Fair-International, suggestions on planning and carrying out projects and exhibits, new ideas for research and sources of information and equipment. How to become a scientist is discussed and helpful suggestions are drawn from the experience of outstanding young scientists. Postpaid 10 copies for \$5.00. Each 55c

LAWS OF MATTER UP-TO-DATE

A new edition of the list of fundamental laws of physics which have been changed as the result of new discoveries of the atomic age. Postpaid 100 copies for \$3.00. Each 10c

PERIODIC TABLE OF ELEMENTS

Both the Mendeleev and Bohr arrangements. An up-to-date chart of the chemical elements by groups and series with spaces for new elements through the hypothetical No. 118, which can be filled in as they are announced. Postpaid 10 copies for \$1.00. Each 25c
