British Salmon Migrate 2,000 Miles to Near Arctic

► BRITISH-TAGGED salmon have been recaptured 2,000 miles from home, as far away as Greenland and the Arctic Circle.

Very long distance migrations are more common than was earlier supposed, according to Dr. A. Swain and W. G. Hartley of the Freshwater Fisheries Laboratory in Whitehall Place, London, and Dr. R. B. Davies of the Central Electricity Generating Board in Cardiff.

"Whether fish that have traveled so far would normally return to their native rivers to spawn is, of course, still unknown," they reported in the British journal *Nature*, 195:1122.

Particularly interesting, they point out, is the recapture of a salmon in October, 1961, near Kangamiut, a small settlement just outside the Arctic Circle. It was tagged as a smolt after entering the cooling water system of the Uskmouth Generating Station near Newport, England.

In 1956 a salmon tagged in Scotland was recaptured in Eqaug Fjord, on the west coast of Greenland. A salmon tagged as a smolt in the estuary of the Miramichi River, New Brunswick, Canada, in 1960 was recaptured on the southwest coast of Greenland and more recently another Canadian salmon was captured in the same area.

These tagging operations show that salmon from both sides of the Atlantic can appear together in the coastal waters of Greenland at some stage during their marine life.

Salmon normally spend half their lives in the ocean and the other half swimming up the fresh rivers to spawn.

BOTANY

Tiniest and Largest Zinnias Win Awards

See Front Cover

► THUMBELINA, A TINY zinnia—the smallest of dwarf zinnias ever cultivated—has won the Gold Medal award of All-America selections. It was the first Gold Medal award since 1950 when the Fire Chief petunia won, as the first red petunia.

Only about six inches in height, the compact everblooming zinnias continue to bloom over a long season. Thumbelina is ideal for edging beds, borders and walks or driveways, and arrangements in shallow bowls or trays are said to be conversation pieces.

The All-America Silver Medal went to Firecracker, a zinnia that produces large flowers of bright and rich scarlet red. These plants grow to 30 inches tall with long-stemmed, giant cactus-flowered blooms six inches across and two inches deep. Firecracker is the first true hybrid zinnia winner.

Among roses, a panel of 10,000 home gardeners has named Tropicana, the new hybrid tea rose, 1963 Rose of the Year. A brilliant orange-red hybrid tea, it has won an impressive list of 13 other top awards in nine different countries, including the title of All-America Rose of 1963. A cross between a Peace seedling and an Alpine Glow

seedling, it performs well in both garden and greenhouse. The rose is seen on this week's front cover.

All-America Selections for 1963 offer five new home garden vegetables: Buttercrunch lettuce, Emerald Cross cabbage, Hercules winter squash, Greyzini summer squash and Executive snapbean. All-America Selections is a non-profit institution for testing and rating of flowers and vegetables.

PHYSICS

Counterclockwise Swirls In Bath Hard to Prove

► YOU CANNOT really try this on your bathtub or kitchen sink. But the vortex or twisting around of water going down the drain under well-controlled conditions is counterclockwise looking downward. That is, it is if you are in the Northern Hemisphere. For the Southern Hemisphere, one will always see a clockwise vortex.

But this is only true if the experimental conditions are very carefully controlled and the so-called Coriolis forces set up by the rotation of the earth are not disturbed and overridden by the swirls of filling the tube and pulling the plug.

Prof. Ascher H. Shapiro of the Massachusetts Institute of Technology performed the experiment for an educational motion picture. He computed that the Coriolis force at latitude 42 degrees is only thirty-millionths that of gravity, which is so small that it will be overcome by filling and even temperature differences and water impurities.

Reporting in *Nature*, 196:1080, Prof. Shapiro offers to share his precise experiment with anyone who wishes to try it below the equator. There is no purpose in trying it at the equator, for these earth forces vanish there. He is very skeptical about those who have claimed to have seen the direction of swirl change as a ship crosses the equator.

Do You Know?

Applying ultrasonic energy to molten metal as it solidifies tends to prevent the growth of long crystals.

MICRO-ADS

Equipment, supplies and services of special interest to scientists, science teachers and students, science-minded laymen and hobbyists. 25¢ per word, payable in advance. Closing date 3 weeks prior to publication (Saturday).

SNL, 1719 N St., N.W., Washington 6, D. C.

GOVERNMENT SURPLUS RADIOS, AIRCRAFT cameras, lenses, snooper scopes. 50 page illustrated catalog, 10¢. Meshna, Malden 48, Mass.

INDEPENDENT THINKERS—INVESTIGATE Humanism, the scientific personal philosophy! Ethical, humanitarian, nonpolitical, nonsupernatural. Free literature. American Humanist Association, Dept. SNL-1, Yellow Springs, Ohio.

MICROSCOPES, ACCESSORIES, PREPARED slides, supplies, etc. Free brochure. New England Science Service, Dept. S-1, P.O. Box 315 Peterborough, New Hampshire.

SPERM WHALE TEETH. (NATURAL IVORY) Small, \$2.50; Medium \$5.95; Large \$6.50. (Polished, double.) Free brochure on whaling items, Eskimo crafts. Peter Dirlam, Southbridge, Massachusetts.

UNUSUAL BARGAINS

Order by Stock No.—Send check or M.O. Shipment same day received—Satisfaction or money back.

NEW! STATIC ELECTRICITY GENERATOR

Sturdy, Improved Model
See a thrilling spark display as you set off a miniature bolt of lightning. Absolutely safe and harmless. Sturdily made—stands 14" high. Turn the handle and two 9" plastic discs rotate in opposite directions. Metal collector brushes pick up the static electricity, store it in the Leyden jar type condenser until discharged by the jumping spark. Countless tricks and experiments. 24 page illustrated booklet included.

Order Stock No. 70,070-Q \$12.95 Postpaid

Remove Your Retaining Rings—Disassemble Lenses, Cameras, etc.

ADJUSTABLE SPANNER WRENCH

Made for U.S. Air Force—available at a fraction of Government cost. A top grade, versatile tool that every instrument and camera repair man or just plain tinkerer should own. Adjustable for 3/4" to 1 1/2" diameter retaining rings. Complete with six different pairs of points to fit all types of slots and holes. 3", 6", and 12" main bars. All steel and nicely plated. The finest tool we have ever come across for this type of retaining ring work AND a real bargain at our low price.

Stock No. 70,355-Q \$12.50 postpaid

INTRIGUING LOW-COST MOON MODEL

Exciting outer space display and conversation piece. Exact replica, 30,000 formations—peaks, craters. Ocean of Storms, etc.—all in relief. Scaled to size. Accurate distance relationships. Proper lighting shows moon phases; black light produces startling effects. Tough, washable plastic. Three colors. Far side blank—can be used for space data. Excellent gift item. 12" dia., wt. 3/4 lb.

Stock No. 70,515-Q \$12.50 Postpaid

NEW LOW PRICE FLASHLIGHT POINTER . . . Point it out with Projected Arrow

Ideal for pointing out interesting features on movie and slide projection screens. Excellent lecture tool. For teacher use on maps, etc. Flashlight focuses an arrow where you point it.

Stock No. 60,117-Q—\$6.95 Postpd.

ASTRO-COMPASS AND TRANSIT

War surplus! Astro Compass alone cost Govt. \$75. We have added a Sighting Level to improve versatility. Hundreds of uses in carpentry, brick laying, foundation work, grading, irrigation or drainage. Much below cost of ordinary surveying instruments. Ideal for do-it-yourselfers. 10 3/4" high, 6" long, 4" wide. Adjustable leveling platform—2 spirit levels for aligning—also spirit level in sighting attachment. A tremendous bargain.

Stock No. 70,267-Q \$19.95 Postpaid

Now . . . FASCINATING EXPERIMENTS with EARTH SCIENCE ACTIVITIES KIT!

For amateurs, professionals, school use. Materials—instructions for nearly 100 remarkable experiments. Identify, classify chemical and physical properties of all rocks, minerals, fossils. Contents: 12 rocks, 24 minerals, 12 fossils; Argon Bulb, goniometer, alcohol burner, streak plate, magnet, blow-pipe, scale, tweezers, magnifying glass, all needed chemicals, plus 96-page illus. book. Comes in sturdy double 12" x 18" x 5" box.

Stock No. 70,573-Q \$24.95 Postpaid

CRYSTAL-GROWING KIT

Do a crystallography project illustrated with large beautiful crystals you grow yourself. Kit includes the book "Crystals and Crystal Growing" and a generous supply of the chemicals you need to grow large display crystals of potassium aluminum sulfate (clear), potassium sulfate (purple), potassium sodium tartrate (clear), nickel sulfate hexahydrate (blue green) or heptahydrate (green), potassium ferricyanide (red), and copper acetate (blue green).

Stock No. 70,336-Q \$9.50 Postpaid
