BOOK OF 15 PARADOXES in Math and Logic

Here's a wonderful way to sharpen your mind. 15 great paradoxes in math and logic. 2 equals 1; a + b does not equal b + a; the distance between two points inside a square inch is longer than the distance from Earth to Sun! 12 more stumbers, compiled by noted Prof. Aubrey Kempner. Paper bound, over 40 pages, pocket size. Only 25¢—no further obligation, nothing more to buy. To get your copy of "Paradoxes and Common Sense" mail this ad with 25¢ and your name and address TODAY to:
D. Van Nostrand Company, Dept. 261, 120 Alexander St., Princeton, New Jersey (Est. 1848)

Keep pace in aero- space technology

with
the ESTES program of
MODEL ROCKETRY

- Ready-to-assemble kits
- Parts for your own designs
- New design booklets
- Technical reports
- MODEL ROCKET NEWS

SCIENCE FAIR PROJECTS

Principles of stability, trajectory, thrust, aerodynamics, acceleration are the same in Estes Rockets as in professional rockets. Win 1st place in your Science Fair. Exhibit the many applications of rocketry

ALL
ESTES MODELS GOOD
FOR MANY FLIGHTS

START NOW. ORDER A KIT TODAY.

No. BS-2 Beginner's Special.....\$2.00
Includes all parts plus 3 engines and instructions to build and fly America's most popular rocket. Also plans, instructions, technical reports to give you a good basic knowledge of Model Rocketry.

No. BS-6 Beginner's Special.....\$6.00
Includes the same materials as in kit No. BS-2, plus America's most used model rocket launcher, capable of launching all rockets offered by Estes Industries.

NEW ILLUSTRATED CATALOG 25c

Penrose 35, Colorado

MICRO-ADS

Equipment, supplies and services of special interest to scientists, science teachers and students, science-minded laymen and hobbyists. 25¢ per word, payable in advance. Closing date 3 weeks prior to publication (Saturday).

SNL, 1719 N St., N.W., Washington, D.C. 20036

BINDERS FOR SNL—BUFF-COLORED BUCKRAM. Snap-in metal strips hold 52 copies. \$4.00 pp. Send order with remittance to Science News Letter, 1719 N Street, N.W., Washington, D. C. 20036.

EXERCISE WITHOUT MOVING! DO TEN 2-SECOND isometric exercises. Write Minute-A-Day, Dept. 5, 37 Centuck Station, Yonkers, N. Y. 10710.

GOVERNMENT SURPLUS RADIOS, AIRCRAFT cameras, lenses, snooperscopes. 50 page illustrated catalog 10¢. Meshna, Nahant, Mass.

INDEPENDENT THINKERS—INVESTIGATE Humanism, the scientific personal philosophy! Ethical, humanitarian, nonpolitical, non-supernatural. Free literature. American Humanist Association, Dept. SNL-1, Yellow Springs, Ohio.

ENTOMOLOGY

Ancient Roach Named Biggest Pest in U.S.

► THE OBNOXIOUS cockroach which has been surviving for millions of years is still doing a superb job of avoiding extermination.

Named the biggest pest in the nation by the National Pest Control Association, the cockroach continues successfully to outwit nature and man.

Its extraordinary ability to adapt to changing environment, to resist chemicals and other lethal weapons, and its inherent craftiness are some of the factors that have allowed this scavenger to survive longer than any other insect.

Cockroach fossils have been discovered in ancient rocks dating back to the Carboniferous period—about 280 million years ago. Of the six orders of insects found in that coal-age period, all but one—the cockroach—have become extinct.

Today they have invaded the flour bins, sugar supplies, nooks and crannies of homes, industries, hospitals and other buildings.

Most of the 3,000 known species of cockroaches live in the tropics, with only about 75 species in the U.S. Among the latter, the German roach, according to the Pest Control, is the most obnoxious and adept at getting along with insecticides.

Nature Note

► OFTEN NOTED for its fine wood, rich nectar, cream and gold flowers, and graceful form is the linden tree or basswood of the family Tiliaceae. The linden is easily distinguished in fall and early winter because of the persistence with which the seeds cling to the branches.

The fruits of the linden tree are among the most ingenious of the many kinds of air transportation provided by plants for the distribution of seeds. The seed-bearing stem is flanked on either side by a wide, leaf-like extension that runs out beyond its sharp angle at mid-length, forming a leafy parachute. It still extends its length considerably before branching in pairs and terminating in from one or two to six or seven hard, round berries.

This beautiful shade tree, with its heart-shaped leaves and rich fragrance when in midsummer bloom, has its origin in the word lind, Old English for lime tree. It is often called the bee tree because of the nectar found in its flowers and its wood has been favored by continental carvers for centuries, especially in religious motifs. The ancients used its soft inner tissues as an antiseptic for binding and healing wounds.

The fairly soft, straight-grained, light-colored wood of the American basswood is used in manufacturing venetian blinds, piano keys, luggage, millwork and especially, cabinets.

Linden trees reach a great size. A German town in Wurttemberg was named Neuenstadt an der grossen Linden because of its famous tree, nine feet in diameter.
