ARCHAEOLOGY

Oil Company "Strikes" Old Indian Burial

See Front Cover

► THE SITE of an oil well was moved to save the site of an early Indian burial ground for archaeologists. Humble Oil and Refining Company of Houston, Tex., was preparing the site for a new well near Colusa, Calif., when diggers noticed small clamshell beads, a stone pipe and other artifacts embedded in the soil. Later four skeletons, of three adults and a child, were unearthed.

Experts believe the burial ground may date back to 500 A.D. The Wintun Indian tribe, living there nearly 1,000 years before the time of Columbus, were a peaceful people who practiced elaborate ceremonies and pageantry.

John S. Clemmer, secretary-treasurer of the Central California Archaeological Foundation, is seen on the front cover examining one of the Indian bones. With him is engineer Lenny Nolan of Humble.
