Board of Trustees of Science Service

Homorary President, William E. Ritter, Univesity of California. Representing the American Association for the Advancement of Science, J. McKeen Cattell, President, Editor, Science, Garrison N. Y.; Burton E. Livingston, Johns Hopkins University, Baltimore, Md.; Raymond Pearl, Director, Institute for Biological Research, Johns Hopkins University, Baltimore, Md. Representing the National Academy of Sciences, W. H. Howell, Vice-President and Chairman of Executive Committee, Johns Hopkins University, Baltimore, Md.; R. A. Millikan, Director, Norman Bridge Laboratory of Physics, California Institute of Technology, Pasadena, Calif.; Representing National Research Council, Vernon Kellogg, Secretary Emeritus, National Research Council, Washington, D. C.; C. G. Abbot, Secretary, Smithsonian Institution, Washington, D. C.; Harrison E. Howe, Editor of Industrial and Engineering Chemistry, Washington, D. C. Representing Journalistic Profession, John H. Finley, Associate Editor, New York Times; Mark Sullivan, Writer, Washington, D. C.; Marlen E. Pew, Editor of Editor and Publisher, New York City. Representing E. W. Scripps Estate. Harry L. Smithson, Treasurer, Cincinnati, Ohio; Robert P. Scripps, Scripps-Howard Newspapers, West Chester, Ohio; Thomas L. Sidlo, Cleveland, Ohio.

Staff of Science Service

Director, Watson Davis, Staff Writers, Frank Thone, Emily C. Davis, Jane Stafford, Marjorie Van de Water, Robert Potter. Astronomy writer, James Stokley; London correspondent, Donald Caley. Correspondents in principal cities and cen-ters of research. Librarian, Minna Gill. Sales and Advertising Manager, Hallie Jenkins.

DO YOU KNOW?

How deep in the sea whales can dive has not yet been discovered.

There is no reason to believe that the ocean has ever frozen solid since life appeared on earth, says a geologist.

It has been estimated that about one person in 3,000,000 may have the experience of seeing a meteorite fall to earth.

Not all butterflies are short-lived: some live almost a year in the adult stage, though they hibernate part of this time.

When cotton plants fail to set a crop of bolls, in bad cotton years, farmers have been blaming the weather; now it turns out that the cotton flea hopper, a tiny insect, is the destructive agent.

State socialism is far from new—the Incas of Peru ruled by an elaborate interlocking system of governmental control, by which each Indian in the empire had his life planned for him in great detail.

Red hair is more common in Scotland than anywhere else in the world.

London, like Washington, has been troubled by starlings that roost in hordes at night on the ledges of down-town buildings.

Milan, Italy, has a new indoor swimming pool which features the latest ideas in pool construction, and has seats for 3,000 spectators.

New York's Central Park has a new picture book zoo," in which the animal cages are labeled with picture book signs such as "E is for Elephant."

The Bureau of Fisheries says that any properly prepared small fish of the herring family can be called a sardineincluding pilchard, sprat, and bristling.

Vision of children as young as three years can be tested by a technique developed some years ago by the National Society for the Prevention of Blindness, and consisting of the letter "E" in various positions.

WITH THE SCIENCES THIS WEEK

Most articles are based on communication to Science Service or papers before meetings, but where published sources are used they are referred to in the articles.

ANTHROPOLOGY

How old is Homo sapiens? p. 173.

ASTRONOMY

Where is the most elaborately entombed insect? p. 168.

What is the longest record for a nova? p.

Where do canoeists pick orchids? p. 168.

CLIMATOLOGY

Was last winter severe? p. 168.

COSMOLOGY

How will the world end? p. 165.

ECOLOGY

How much do prairie trees suffer from a reaily severe drought? p. 169.

ETHNOLOGY

What can "AE" do for Indians? p. 167.

ICHTHYOLOGY

Are there eels in Ireland? p. 175.

INVENTION

Can you play the piano while lying in bed? p. 165.

What is the outstanding symptom of myasthenia gravis? p. 174.

METEOROLOGY

What does an air mass indicator measure?

How fast does a dust storm travel? p. 167. NUTRITION

What can white rats tell about food? p. 166. Can bad diet hurt false teeth? p. 168.

How small can opossums be? p. 169.

PALEOBOTANY

How can you see through coal? p. 172.

What lock can be insured against being picked? p. 164.

Are scientists likely to find the negative pro-

PHYSIOLOGY

Why is boys' hair uncombable? p. 172.

PSYCHOLOGY

How much should a radio announcer talk? p. 165.

What is the first glimpse of the world like? p. 170.

PUBLIC HEALTH

How much scarlet fever is there in the United States at present? p. 168.

ZOOLOGY

Where have tame cats become wild cats? p. 169.
