323	Caption	Line 6, Natural for National
367	Fossil Found in Colorado	Par. 6, line 6, microammeter for micrometer
372	New Electrical Micrometer	

TELEFACT, amazingly successful in America's newspapers is now available for teachers, authors, magazine editors and readers in the handy booklet:

"461 TIMELY PICTOGRAPHS"

TELEFACTS are interesting little charts that tell at a glance facts that ordinarily would require hundreds of words of written explanation. You've seen TELEFACTS in SCIENCE NEWS LETTER and, possibly, some of the more than thirty fine newspapers that use them every day.

Many teachers mount these charts on 3" x 5" cards for classroom study. They can be used with opaque projection lanterns to illustrate lectures. Several authors have used TELEFACTS to illustrate their books and magazine editors find them valuable for adding punch to their articles.

"461 TIMELY PICTOGRAPHS" is conveniently arranged for clipping or for just plain reading. The booklet sells for \$2. For further description and for special rates for republication privileges, write to
