A SCIENCE SERVICE PUBLICATION

An entire season of baseball action—from Opening Day to World Series—is yours with RCA Victor television.

You're right in the game — with Television

● Comes the shout "Play Ball!" and there you are . . . right on top of every play.

Through television developments in RCA Laboratories, all the action is yours — the crack of bat against ball — fast infield plays — even side-lights in bull pen, dugout, grandstand and bleachers.

At the ball park, RCA Image Orthicon television cameras — rivalling the

human eye in sensitivity—get all the action in day or night games. Shifts from over-all views of the field, to "close-ups," of individual players are swift and revealing . . .

And at the *receiving end* — your RCA Victor "Eye Witness" home television set gives you brighter, clearer pictures. You can see the ball that the batter misses, or you can watch his home run smash sail over the distant fence.

Today, because of the original and continuing work of RCA scientists, millions can enjoy sports, entertainment, educational and news events, on television. Research at RCA Laboratories—always a "step ahead"—enters every instrument marked RCA or RCA Victor.

When in Radio City, New York, be sure to see the radio, television and electronic wonders at RCA Exhibition Hall, 36 West 49th St. Free admission. Radio Corporation of America, RCA Building, Radio City, New York 20, N. Y.
