

Quest Through the Archives

Directions: After reading the article "Charging the future," use the archives at <u>www.sciencenews.org</u> to answer these questions:

1. Search for an article discussing unusual materials that might be used to make batteries. Explain how the material could be beneficial in a battery.

2. Find an article that discusses the revamping of an early battery technology. Explain it.

3. Find an article that talks about alternatives to batteries for powering personal electronic devices. Describe what you find.
