These Too May Fall

Serious personal computer enthusiasts read

BYTE®

the leading magazine in the personal computer field

Readers look forward to each monthly issue of **BYTE** for information on:

- software
- hardware
- simulations
- computer games
- robotics and scores of other novel applications
- computers and calculators
- languages and compilers techniques
- custom systems design

Tutorial information for both the beginner and experienced computer user.

To be aware of fast-paced changes in the fast-growing field of microprocessors you need to read **BYTE**—acknowledged as the leading magazine in the personal computer marketplace. You will find **BYTE** tutorials on hardware and software invaluable reading, the reports on home applications instructive, and the evaluative reviews based on first hand experiences with home computer products stimulating.

computers for personal satisfaction in activities as wide ranging as electronic music, video games, investment analysis, household management, systems control, and other areas of vital interest to computer enthusiasts.

Each monthly issue of **BYTE** is packed with timely articles by professionals, computer scientists and serious amateurs. Isn't it time you enjoyed their company? Subscribe **now** to **BYTE**...the Small Systems Journal.

BYTE editorials explore the fun of using and applying

Read your first copy of **BYTE**, if it's everything you expected, honor our invoice. If it isn't, just write "CANCEL" across the invoice and mail it back. You won't be billed and the first issue is yours.

Bally Arcade \$399

Radio Shack TRS-80 \$599

Ohio Scientific C2-4P \$598

CREATIVE COMPUTING magazine is Number 1 in hardware, software and system evaluations. In-depth, thorough evaluations give you the facts **before** you buy. **Creative Computing** was the first to review these now popular systems: Radio Shack TRS-80, Exidy Sorcerer, VideoBrain, Heath H-8, Bally Basic, OSI Challenger, and many others. More important, we also review peripherals and software from independents as well as manufacturers.

And what are you going to do with it?

CREATIVE COMPUTING has long been Number 1 in applications and software for micros, minis, and time-sharing systems for homes, schools and small businesses. Loads of applications every issue: text editing, graphics, communications, artificial intelligence, simulations, data base and file systems, music synthesis, analog control. Complete programs with sample runs. Programming techniques: sort algorithms, file structures, shuffling, etc. Coverage of electronic and video games and other related consumer electronics products, too.

Just getting started? Then turn to our technology tutorials, learning activities, short programs, and problem solving pages. No-nonsense book reviews, too. Even some fiction and foolishness.

Subscriptions: 1 year \$15, 3 years \$40. Foreign, add \$9/year surface postage, \$24/year air. Order and payment to: Creative Computing, P.O. Box 789-M, Morristown, NJ 07960. Visa and Master Charge acceptable by mail or phone; call **800-631-8112** (in NJ call 201-540-0445).

CREATIVE COMPUTING also publishes books, games, art prints, and T-shirts for the computer enthusiast. The

most popular book of computer games in the world, **Basic Computer Games** is a Creative Computing book — only \$8.50 postpaid.

And now, Creative Computing also produces and markets software for personal computers on tape cassette and floppy disk.

If your dealer does not carry the full line of Creative Computing products, write "catalog" on your order and we'd be happy to send you one free.

You can order any of these products by circling the number indicated on the Science News reader service card. We'll bill you.
